Celestial Misfits: Roadmap for Staff

Oct 18, 2026 · @MoonDoggy

What we're building

Celestial Misfits is an **event-driven PvE server**: no grind for its own sake, something new to do all the time, and fair to the many quiet solo players. The goal is a new event every month.

Two ways to play:

- **Events** (the main lane): bosses, summons, pirates, world events and a big seasonal headliner.
- **Quests** (the steady lane): the Daily Board rolls new quests every morning at about 4 a.m. Central, with a weekly quest on Mondays.

The rules every feature follows. Staff, this is the yardstick when players suggest things:

1. **Showing up pays.** Taking part always earns something, even when you don't win.
2. **Easy co-op.** Strangers can help each other without forming a team first.
3. **Variety beats grind.** Doing many different things pays more than repeating one thing.
4. **Solo-friendly.** Difficulty grows with group size, so solo players are never shut out.
5. **Recognition.** Announcements, leaderboards and titles, so people see who did what.
6. **No loopholes.** Players WILL find them, so every reward is closed off against abuse. If you spot one, report it (see the staff section).

Coming up next

Halloween starts Tuesday, Oct 20, and runs through Oct 31. Everything below is built and being tested on Dev now.

- **Ectoplasm** drops from scientists, scarecrows and predators, double during the Witching Hour. Spend it with **/ecto shop**.
- **Ghost sheet costume:** your whole team must wear one to earn Ectoplasm. One free sheet per player per season: **/ecto costume**.

- **The community meter:** players offer Ectoplasm (**/ecto offer**). When it fills, the **Headless Horseman** rides out of Grimwood Hollow, a pumpkin-headed rider with a fireball-throwing chainsaw.
- **Halloween Nights:** the Harvest Moon, the Witching Hour, the Lying Fog, trick-or-treat at doors (**/hw**) and the Soul Lantern run.
- **Grimwood Mutual:** the Undertaker's funeral insurance (**/mutual**). It's a joke product that pays out, with fine print that is part of the fun. Players will ask; the answer is "read the fine print."
- **Ghost Rider: /gr** sets your horse ablaze.

Then, back to back:

Dates	Season	What it's like
Nov 1 – 2	Día de los Muertos	Sugar Skulls; honoring the dead
Nov 3 – 10	Marine Corps Birthday	Eagle, Globe & Anchor tokens, kept for life, earned in combat. Respectful tone.
Nov 11	Veterans Day	A day to thank every veteran. Respectful tone, no jokes.
Week of the 4th Thursday	Thanksgiving	Wishbones, a turkey boss, harvest quests
Evening of Dec 4 – Dec 12 (2026)	**Hanukkah (new)**	Hanukkah Gelt, eight nights. Dates are calculated each year.
Dec 15 – 26	Christmas	Candy Canes

Memorial Day, Veterans Day and the Marine Corps Birthday also point players to **/lifeline**, the private crisis line command. Please keep chat respectful on those days.

The seasons calendar

Every holiday has its own token, earned from kills and spent in that season's shop. Each command works the same way as /ecto (shop, buy, offer). Only the season that's on, or whose shop is still open, answers.

Season	Dates	Token	Command
New Year's	Dec 30 – Jan 2	Firecrackers	/boom
Valentine's	Feb 7 – 14	Rusty Hearts	/heart
Easter	The week ending Easter Sunday	Chipped Eggs	/egg
Memorial Day	The week ending the last Monday of May	Memorial Plaques	/plaque
4th of July	Jul 1 – 7	Liberty Scrolls	/liberty
Labor Day	The week ending the first Monday of September	Hard Hats & Hammers	/hardhat
Talk Like a Pirate Day	Sep 17 – 21	Doubloons	/doubloon
Halloween	Oct 20 – 31	Ectoplasm	/ecto
Día de los Muertos	Nov 1 – 2	Sugar Skulls	/skull
Marine Corps Birthday	Nov 3 – 10	Eagle, Globe & Anchor (kept for life; shop open all year)	/ega
Veterans Day	Nov 11	Helmet & Folded Flag	/flag
Thanksgiving	Mon–Sun around the 4th Thursday of November	Wishbones	/wishbone
Hanukkah	Eight nights, from the Hebrew calendar (Dec 4 – 12 in 2026)	Hanukkah Gelt	/gelt
Christmas	Dec 15 – 26	Candy Canes	/candy

The full list of player commands is on the website's Player Guide (celestialmisfits.com).

Bigger projects in the works

None of these are live yet. They're planned, and some are partly tested. Please don't promise players dates.

The car dealership

- **A salesman NPC on a dealership lot**, with a **showroom**: real Karuza vehicles frozen on display. Customers can open the back and look inside, but can't drive, loot or move them. Tested on Dev and working.
- **Every vehicle gets a description** in the shop, so players know what they're buying.
- **Trim levels.** Example: the **Utility Truck 3** (stock), the **Junkyard Dog** (adds a recycler), and the **Mothership** (recycler, Workbench 3, computer station, heavy off-road suspension: a base on wheels).
- **One vehicle type per family per wipe,** with **trade-in upgrades** at the dealership: hand back the lower trim and pay only for what the new one adds.
- **Grimwood Mutual wipe policies** (expensive): a **Vehicle Title** gets your vehicle back, empty, after a wipe. A **Cargo Policy** brings some contents back too, with a banned list so nobody starts a wipe with explosives.
- **Coming from Karuza at the next wipe:** livestock trailers. A **Cattle Haul** trucking event is planned around them (yes, the cows moo).

The Gunsmith (custom weapons)

- **Custom weapons will be earned, not bought.** The price is **Gunsmith Marks** (bound to you, a *chance* to drop from hard content) plus one **signature part** per weapon (tradeable, a chance drop from content that fits it, e.g. a Hellfire Rotor from the Patrol Heli).
- **Vehicle trims work the same way,** with upgrade kits (Recycler Kit, Workbench Kit…).
- **Daily drop limits** per player type, one of each weapon per wipe, and every chance tuned from **tester feedback**: tell us if it's too hard or too easy.

The Bank and the bank heist

- **A bank** (MaLai's monument) where players deposit scrap and season tokens at the teller. It's a safe zone with friendly guards.
- **The heist:** an item starts a robbery. Guards turn on the robbers only; bystanders are never hurt. It scales with the crew: a **Bradley** joins at 4+ robbers, a **patrol heli** at 6+, and everything gets +25% health at 9+.

Critters

- **Killer Bunnies** (Easter): a harmless-looking rabbit grows to three times its size, yells about its precious eggs, and charges. Tested on Dev and working.
- **The Heckler Squirrel** (rare, all year): a squirrel grows, sits up and roasts you like an old friend, then scurries off.
- **Frog ideas:** a Frog Derby you bet on at the bank, Kiss the Frog for Valentine's, and the Swamp Oracle that croaks out tips.

Raidable Bases

- **They're on our other server.** Players take the portal (/portals). It's still PvE: you raid the bases, not players.
- **Raid difficulty is not player difficulty.** Easy to Nightmare is how tough the *base* is; /difficulty is about *you*. Expect this question.
- **Planned:** an **Elite** raid tier to match the player levels, a config and loot review, and possibly one special base with an extremely rare custom-weapon drop.

New map pieces (MaLai prefabs)

- **Christmas map:** Santa's Home, Santas Home 2, Santas Villa (for a **Santa's Late Delivery** event) and the **Winter Village** as the Christmas hub.
- **Next Halloween:** the **Crypt** (where the Horseman rises) and the **Rabbit Farm**, both real monuments with a green keycard puzzle.

Also planned

- **Monument Runs:** timed runs of the oil rigs, launch site and more, with gold, silver and bronze times and leaderboards.
- **An in-game Help menu** (in ZenPanel), plus Tickets, Mail, Changelog and a When's Wipe page.
- **Earned chat titles,** like [Darwin Award] or [Horseman's Bane].

For staff: your tools

Admins, mods and alphas have a few tools the players don't. Everything you spawn or change is logged.

Spawning custom weapons (RocketMan)

- **/rm** opens the **Spawn Weapons** window: one button per custom weapon, one per click, into your inventory.
- **/rm give <weapon> <player>** gives one to someone else (mods only).
- **Every spawn is logged** with who, what and to whom. Spawn for testing, never for friends.
- **Rocket modes** (button at the bottom of the window): turns **any** gun you hold into a rocket gun. *Ammo mapping* means the rocket matches the ammo loaded (HV ammo fires HV rockets). Custom weapons always keep their own mode.
- **Rockets cost rockets** (one per shot) unless you have the free-fire permission (alphas do).

Weapon	Shortname	What it does
Hellfire M249	m249.hellfire	Fires rockets; double damage vs. helicopters
Thumper	thumper.mortar	Mortar: a lead rocket, then a six-rocket barrage
Yeet Machine	catapult.yeet	Catapult: boulders plus up to four C4
CattlePult	catapult.cattle	Catapult: throws a cow
My Preciousssss	pistol.precious	Pistol: high-velocity rockets
Hail Mary	eoka.hailmary	Eoka: one rocket, then it breaks (repair to reuse)

The Hellfire's shortname changed from hell.fire.m249 to **m249.hellfire**. Players' existing Hellfires are unaffected.

Difficulty

- **Staff can change difficulty any time,** with no 24-hour wait.
- **The 2-hour reward lock still applies to everyone,** staff included. After moving *up* a level, rewards pay at the old level for 2 hours. This stops "fight on Easy, switch to Nightmare for the payout."
- **NPC kills pay at the lowest level of anyone who hurt the NPC.** If a player asks why they got less RP, check whether a lower-level friend helped.
- **Difficulty never changes loot,** only RP, damage, gathering and hunger. Crates are the same for everyone.

Testing on Dev before Halloween

- [ ] MisfitsItems 1.14.0 loads; /mitems lists Gelt with its icon
- [ ] Seasons 1.6.0: no console warnings; forcing Halloween on makes Ectoplasm drop
- [ ] Lifeline 1.0.3: /lifeline and /lifeline talk
- [ ] RocketMan 1.12.6: Spawn Weapons window, Rocket modes button, the "1 Normal" button is full size
- [ ] Difficulty 1.4.4: staff can switch freely; the reward lock still holds

Found a bug or a loophole?

Write down what you did, what happened, and what you expected, then message **MoonDoggy on Discord: zzmoondoggy**. A screenshot of the console error helps a lot. **Loopholes go to MoonDoggy privately,** never in public chat.

Ideas on the shelf

These are ideas, not promises. Player suggestions that fit the rules above can join this list.

- **Community goals:** the whole server fills a meter together and everyone who helped gets paid.
- **Treasure maps, a wandering merchant, caravan escorts.**
- **World events:** meteor showers, blizzards, an eclipse with night creatures.
- **Contests:** a fishing derby, a build contest, a County Fair with horse and livestock judging and ribbons.
- **More vehicle events:** Roadside Rescue (tow a broken-down truck to Oxum's), a Fuel Shortage run, a Cannonball Run race, Wildfire with the water heli, and more.
- **Our own vending** for custom items in Rust's normal vending screen.
- **Next Halloween:** a real storefront for Grimwood Mutual ("floor models, gently used").
