Celestial Misfits: The Week in Review (Oct 11 – 18)

Oct 18, 2026 · @MoonDoggy

At a glance

In one week we built or updated 24 plugins, got Halloween ready to launch, and put Celestial Misfits on the web. That's from the files themselves: every plugin version saved between Oct 11 and Oct 18.

- **Halloween is built:** the Seasons framework, the Headless Horseman (44 builds), Halloween Nights, Ghost Rider, Grimwood Mutual and the Ectoplasm token.
- **14 holiday seasons** with their own tokens, dates calculated automatically (Easter, Thanksgiving, Hanukkah and more).
- **celestialmisfits.com is live,** with a home page, a player guide and the "You're not alone" crisis page.
- **Lifeline:** a private in-game way for anyone in a dark place to reach help.
- **New ZenPanel tabs** of our own: Welcome, Season, When Wipe and Admin.
- **Proven on Dev:** Killer Bunnies (they grow and charge), the frozen vehicle showroom, and the Thumper and Hail Mary weapons.
- **A big roadmap** for the dealership, the Gunsmith, the bank heist and more.

Plugins built or updated

Everything below is our own code unless noted. Versions show where each plugin started the week and where it ended.

Plugin	This week	What it does now
Headless Horseman	new → 1.0.44	Halloween finale boss: a pumpkin-headed rider with a fireball-throwing chainsaw, summoned by the Ectoplasm meter

Plugin	This week	What it does now
Seasons	new → 1.6.0	Every holiday from one config: tokens, drops, shops, the community meter. Moving dates (Easter, Thanksgiving, Hanukkah) calculated automatically
MisfitsItems	1.1.0 → 1.14.0	Our custom items: all 14 holiday tokens plus the Foal Token, each with its own icon
Halloween Nights	1.4.7 → 1.5.1	Harvest Moon, Witching Hour, Lying Fog, trick-or-treat, Soul Lantern run
Ghost Rider	2.0.1 → 2.4.0	Flaming skull, fire trail and a burning horse
Grimwood Mutual	new → 1.5.1	The Undertaker's funeral insurance, fine print and all
Wild Names	1.7.0 → 2.0.1	Named animals and bosses, now with fight claiming, team scaling and perk loot
Difficulty	1.0.4 → 1.4.4	Per-player difficulty, RP scaling, summon payback, staff no-lock, NPC kill-stealing closed
RocketMan	1.11.3 → 1.12.6	Custom weapons. Added the Thumper fix, the Hail Mary, the Spawn Weapons window and a staff give command
Pirates	0.3.8 → 0.6.1	The pirate ship event, with perk loot in the Captain's Chest
Daily Board	new → 1.0.2	Daily and weekly quest rotation at 4 a.m. Central
Horse Breeding	1.4.0 → 1.6.0	Claiming, genes, breeding and Foal Tokens
ZenSeason	new → 1.5.2	The SEASON tab in ZenPanel: the guide to whatever holiday is on
ZenWelcome	new → 1.4.1	The daily WELCOME tab in ZenPanel
ZenWhen	1.1.0 → 1.2.0	The "WHEN WIPE??" tab, which gets meaner the more you ask
ZenAdmin	new	Staff-only Admin tab in ZenPanel
Lifeline	new → 1.0.3	/lifeline: private crisis lines, and a way to reach MoonDoggy

Plugin	This week	What it does now
Misfits Vehicle Manager	1.0.8 → 1.0.9	/mvm import for new Karuza vehicles, descriptions, safe /pickup
SleeperDespawner	1.3.0 → 1.4.1	Cleans up long-asleep players
NoPower	2.3.0 → 2.4.0	Free power for player electrics
Death Roast	3.8.3 → 3.8.4	Death roasts, now with Wild Names' animal names
ServerChat	1.8.0 → 1.8.1	Chat features and the "when wipe" answer
CustomAnimalSpawns	adapted, 0.2.0	Hand-placed animal spawn points (based on k1lly0u's plugin)
KaruzaShoppyVehicles	1.0.1 → 1.0.2	Grimm530's vehicle exporter: we fixed its skin bug, to share back with him

Test tools built and retired this week: HorsemanLab (proved the Horseman's rider works), CritterProbe (proved the Killer Bunny) and ShowroomProbe (proved the frozen showroom).

Seasons, tokens and art

Every holiday of the year now has dates, a token and a command, and the art to go with it.

- **14 seasons:** New Year's, Valentine's, Easter, Memorial Day, 4th of July, Labor Day, Talk Like a Pirate Day, Halloween, Día de los Muertos, the Marine Corps Birthday, Veterans Day, Thanksgiving, **Hanukkah (new this week)** and Christmas.
- **Respectful seasons:** Memorial Day, the Marine Corps Birthday and Veterans Day use plain, respectful wording and point to /lifeline. Halloween ends Oct 31 so Día de los Muertos has its own two days.
- **The Eagle, Globe & Anchor:** the Marine Corps Birthday token is earned only, kept for life, and can't be traded or looted. "Semper Fi."
- **Season banners** for all 14 holidays, widened for the website and the in-game header.
- **Logos:** the howling hound (square, round and sticker versions), the rocket badge and the motto seal.

- **Item icons:** the insurance policy, vehicle keys (sedan, pickup, minicopter, boat, UTV) and the Hanukkah Gelt coin.
- **Weapon icons:** the Yeet Machine, CattlePult, Thumper, Hail Mary and My Preciousssss (with the gold ring inlaid), plus two Hellfire concepts.
- **Vehicle shop icons** for the Cobras, the novelty cars and the jetpacks, and the galleon.
- **The economy workbook:** every vehicle priced in both RP and scrap, from hours of play.

Website, Lifeline and 214 Life

celestialmisfits.com went live this week on GitHub Pages, with the domain pointed from Squarespace.

- **Home page:** a season-aware banner that changes with the holiday, the motto ("Where common sense goes to die, and stupid sh*t gets rewarded"), "A Rust server for misfits, run by some," the creed seal, the seasons calendar, the custom weapons, the Discord invite and a donate section.
- **Player Guide:** every player command, searchable, by topic. This week it gained the Trucker Event, each season's command and Raidable Bases (on the other server, through the portal).
- **"You're not alone":** the Veterans Crisis Line (988, then 1), the 988 Lifeline, international helplines, and MoonDoggy's own words, signed.
- **214 Life:** the nonprofit's motto ("When you have purpose, you don't have time for demons"), its work stopping more than 14,000 veteran suicides, and the **Jump S.T.A.R.T.** program (donated vehicles fixed up for veterans; contact Herb Anderson).
- **The Lifeline plugin:** /lifeline shows the crisis lines privately; /lifeline talk reaches MoonDoggy. **Nothing anyone says is saved or logged,** and only a name waits if he's offline.

Tested and proven on Dev

These were tried in the game and work.

What	Result
Headless Horseman	The rider stays in the saddle; the full fight tested ("amazing as it is")

What	Result
Seasons	Ectoplasm drops and the shop work
Daily Board	Rolls new quests on schedule
Thumper	Fires its rocket barrage (the shell bug is fixed)
Hail Mary	One rocket, then it breaks, as designed
My Preciousssss	Fires high-velocity rockets
Killer Bunny	A real rabbit grows to 3x, takes hits on its big body, charges with real running legs, and doesn't flee when shot
Vehicle showroom	A frozen vehicle never moved, with zero resets; can't be entered, driven, looted or damaged; the back door opens so customers can look inside

One big bunny is still wandering Dev at three times its size. It will shrink at the next restart.

Planned this week

These designs went onto the roadmap, ready to build. Most were worked out in detail, loopholes included.

- **The car dealership:** a salesman, a showroom (Karuza said yes), vehicle descriptions, and trim levels like the Junkyard Dog and the Mothership. One per family per wipe, with trade-in upgrades.
- **The Gunsmith:** custom weapons earned with Gunsmith Marks and signature parts, chance drops, daily limits, VIP at half price but still locked. Vehicle trims use the same system with upgrade kits.
- **The Bank and the heist:** deposits at the teller, a safe zone, and a heist that scales from guards to a Bradley to a patrol heli. Bystanders are always protected.
- **Critters:** Killer Bunnies for Easter, the Heckler Squirrel, and frog ideas (the Frog Derby, Kiss the Frog, the Swamp Oracle).
- **Grimwood Mutual policies:** Vehicle Title, Cargo Policy, and Time Travel Insurance for Karuza's flying DeLorean ("Paradoxes not covered").

- **Map pieces from MaLai:** Santa's homes and the Winter Village for Christmas, the Crypt and Rabbit Farm for next Halloween, and the Bank.
- **Karuza's livestock trailers** (out at the next wipe): a Cattle Haul event, with mooing.
- **Raidable Bases:** a config review, an Elite raid tier, and a policy of no custom weapons in raids (except maybe one very rare jackpot base).
- **A staff roadmap,** written for admins and mods.

Still open

Halloween starts Oct 20, so the Dev test comes first. These are built but not yet compiled or tested:

- [ ] MisfitsItems 1.14.0, Seasons 1.6.0 and the new Seasons.json
- [ ] Lifeline 1.0.3
- [ ] RocketMan 1.12.6, Wild Names 2.0.1, Pirates 0.6.1 (the Hellfire rename)
- [ ] Difficulty 1.4.4
- [ ] Misfits Vehicle Manager 1.0.9 and the fixed exporter: run /mvm import and review the list before confirming

Loose ends:

- [ ] Website: the server connect address and the Tip4Serv donate link
- [ ] Season shops for the quieter holidays still need items
- [ ] Check the Hail Mary and My Preciousssss skins are free Workshop skins, not paid ones
- [ ] Send the fixed exporter back to Grimm530
- [ ] Turn debug options off before going live
